

Patients may often become nervous in a medical setting. We want to make certain your questions are answered and suggest you read the following in preparation for your next visit:

1. Make a list of all your questions or goals for your visit.
2. If you are new to the House Clinic, please bring any diagnostic reports with you. If you are a returning patient, please note any new diagnosis or additional symptoms since your last visit.
3. Bring a complete list of your medications and note any change in medications.
4. Know your personal and family medical history.
5. Bring somebody with you if you feel you will have difficulty comprehending or remembering what we discuss.
